Price Guide Layout Details

- * This is an 'on-going' guide to the values of Australian-related soundtrack releases.
- * All prices shown are in Australian dollars (for U.S. dollar comparison deduct 20%).
- * All entries are in alphabetical order - Titles beginning with 'THE' or 'A' have had the words allocated to the end of the title.
- * Price fluctuations shown against each listing take into account condition - nothing less than VERY GOOD to NEAR MINT.
- * All efforts have been made to assure that pricing reflects the current state of the market, both locally and overseas.
- * CD pricing reflects second-hand items... NOT recommended retail pricing.
- * Audio cassettes (CA) have NOT been included within this listing unless they are the only soundtrack example made available. Values for audio cassettes are usually \$2-4. For complete audio cassette details see the original publication.
- * If printing this file note that 'PAGE SETUP' is set to 'US Letter Small'.
- * **PLEASE NOTE:** This is a **GUIDE**... not a **BIBLE!** - "*A collectable is worth what YOU want to pay for it!*"

Type of recording...	(ST)	SoundTrack (The entire recording relates directly to the specific production. (ST) is shown on compilation recordings only if no entire release exists.
	(OP)	Original Performer. (Original artiste(s) on non-soundtrack release).
	(AD)	ADaption. (Adaption of original recording by non-original performer).
	(IN)	INspired. (The recording was inspired by a specific production).

The bracketed **(t)** placed immediately after the format type indicates a single related **(t)**rack on a recording...

LP(t) 45(t) CD(t) CD(s) denotes a CD single.

If the recording is on a 45 and it is found that only one side relates to a specific production then the **(a)** or **(b)** symbol is used to identify whether the listed work is on **Side a:** or **Side b:** of that disc...
